I hereby declare that the essay is written solely by myself. Contents from others' research and articles are cited with "[...]" with origins included in the **Reference** section.

The 9.09% similarity mostly comes from the 1st and 6th blocks (segmented by VeriGuide.) The 1st block is the introduction section where a long proper noun **severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)** was mistakenly suspected as plagiarism by VeriGuide. Similarly in the 6th block, the proper noun **Middle East respiratory syndrome (MERS-CoV)** was falsely reported.
